Aryaman Bhati

Chief Technology Officer — Platform & Marketplace Systems

aryaman@waterola.com — linkedin.com/in/aryaman — github.com/aryamanbhati

Professional Summary

Technology leader with **10+ years of experience building scalable digital platforms, marketplaces, and distributed systems**. Expertise in backend architecture, cloud infrastructure, and data-driven platforms in high-growth startup environments. Proven ability to lead engineering teams, design scalable products, and translate business ideas into production-ready systems.

Education

Indian Institute of Technology Delhi 2009 – 2013
B.Tech in Textile Technology
Minor in Computer Science

Professional Experience

Senior Software Engineer / Engineering Lead 2019 – Present
Amazon Web Services (AWS), Bangalore

- Led development of **high-availability distributed microservices** serving millions of requests daily.
- Designed scalable backend systems using **Java, Python, Kubernetes, and AWS infrastructure**.
- Improved service reliability and reduced infrastructure costs by **30% through architecture optimization**.
- Mentored a team of **8 engineers**, overseeing code reviews, architecture decisions, and system design.

Software Engineer II 2016 – 2019
Uber Technologies, Hyderabad

- Built backend services powering **real-time ride matching and routing algorithms**.
- Implemented high-performance APIs using **Go and Python** supporting thousands of concurrent requests.

- Contributed to improvements in dispatch latency and route optimization algorithms.
- Designed scalable data pipelines to process ride demand data and improve system responsiveness during peak hours.

Software Engineer 2014 – 2016
Flipkart, Bangalore

- Developed scalable **payment and checkout microservices** used by millions of customers.
- Implemented caching systems and asynchronous pipelines to improve **checkout performance by 40%**.

Technical Skills

Programming Languages: Python, Java, Go, C++

Backend & Infrastructure: Microservices Architecture, Distributed Systems

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines

Databases: PostgreSQL, MySQL, MongoDB, Redis

Data & Analytics: Apache Spark, Kafka, Data Pipelines

Leadership & Entrepreneurship

Co-Founder & CTO – WaterOLA

- Architected the technology platform for an **Uber-style digital marketplace for inland water transport**.
- Designed mobile and backend architecture enabling **real-time booking, GPS tracking, and digital payments**.
- Built roadmap for scalable infrastructure supporting cargo logistics and tourism bookings across India's waterways.

Achievements

- Led development of systems serving **millions of users globally**.
- Reduced infrastructure costs and improved scalability in multiple production platforms.
- Speaker at internal engineering architecture forums.
